

Are you interested in saving money and resources?

Commercial food service customers of SoCalGas® and LADWP are eligible for a **NO COST** Foodservice Energy Survey.

The purpose of the onsite survey is to help our valued foodservice customers in making informed decisions on how to save money and resources in their operation. This information will help operators prioritize where to spend your money when making repairs and/or purchasing new equipment.

An independent energy analyst will visit your site to review current operations and see where improvements can be made and help identify ways you can save energy. The survey results will be presented in a written report that highlights the following:

- Graphical display of gas, electric, and water usage
- Estimated utility bill savings
- Relevant rebates and incentive programs
- Specific ways to save gas, electricity, and water
- Photos will be included

INTERESTED? It's easy to get started, all you need to do is...

1. Decide to participate! Contact Riki Nanno at RNanno@semprautilities.com or 562-803-7330.
2. Schedule a time to have our energy analyst conduct the survey at your facility, this will take approximately 1-2 hours.
3. That's it! In a couple of weeks, you will receive your detailed report. We will gladly go over the report to answer any questions you may have.

Non-residential foodservice operations within other facility types (such as schools and hospitals) are eligible, however only the kitchen and its relevant systems will be assessed.
