Neither the Metropolitan Water District of Southern California (MWD), nor your local water utility or Retail Water Purveyor, or their contractors or agents, makes any representation or warranty regarding the devices eligible for rebates under the SoCal Water$mart rebate program, including any hazardous substances that may be contained in them. By participating in the rebate program, the applicant agrees to waive and release Metropolitan, the Local Water Utility or Retail Water Purveyor, and their contractors or agents, from any and all claims and causes of action arising out of the purchase, installation or use of the devices purchased in connection with the Rebate program. Any claim you may have based upon any defect or failure of performance of a device purchased by you should be pursued with the manufacturer or distributor. Please note that the rebate amount offered may vary by agency.

Your actual rebate may vary depending upon the cost of the device(s) purchased.

Water conservation rebates are not taxable by the State of California. However, the U.S. tax code is not clear on whether water conservation rebates are considered taxable federal income. Metropolitan has determined that until the federal tax code clearly states that water conservation rebates are exempt, we must issue 1099-MISC forms to those who receive a rebate of $600 or more. Rebate recipients are strongly encouraged to consult with their tax adviser regarding the rebate.
